

MEASURING CHART & ORDER FORM

LADIES

When you have measured both of your feet, use this chart to work out your shoe size and width fitting.

LADIES' MEASURING CHART						
SIZE	V		2V		6V	
	E	EEE	EE	4E	6E	8E

USE THIS PINK FOOT FOR LADIES' FEET

Don't be surprised if you go down a size in our shoes and up a fitting - it may be that you have been wearing shoes that are too long to attain the width that you need.

USE THIS BLUE FOOT FOR MEN'S FEET

MEN

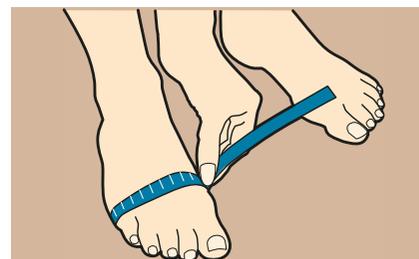

When you have measured both of your feet, use this chart to work out your shoe size and width fitting.

MEN'S MEASURING CHART						
SIZE	V		2V		6V	
	E	EEE	EE	4E	6E	8E

QUICK SIZE GUIDE

Use our measuring chart to assess the fitting you require. Please wear your usual hosiery or socks when measuring your feet.

- For ladies' shoes, use the pink chart.
- For men's shoes, use the blue chart.

This is a guide only; to ensure correct fitting footwear we advise seeking professional advice.

- Measuring foot length**
 - Place the measuring chart against a wall or upright surface so **A** is touching the wall.
 - Place heel on the chart as shown.
 - Select the first line beyond your longest toe and note the size.
 - Repeat for your other foot.
 - Your size is the size of your largest foot.
- Measuring foot width**
 - If possible use a flexible measuring tape. Otherwise, cut out our tape measure.
 - Measure your foot circumference (in millimetres) at the widest point as shown - around your big toe and little toe joints - and note the measurement.
 - Ensure your weight is fully on your foot when you measure it.
 - Repeat for your other foot.
 - Your width is the circumference of your largest foot.
- Finding your size**
 - Use our handy charts to find your size.
 - For ladies' shoes, use the pink chart.
 - For men's shoes, use the blue chart.
 - Locate your size in the left column.
 - On the same line, find the nearest number above your foot width.
 - Note your fitting at the top of that column.
 - See example below - if your foot measures 240mm and your size is 6. You can wear EITHER a 4E, V or 2V fitting.

SIZE	V		2V		6V	
	E	EEE	EE	4E	6E	8E
3	212	224	218	230	243	255
4	218	230	224	237	249	262
5	224	236	230	243	256	268
6	230	242	237	249	262	275
7	237	249	243	256	268	281
8	243	255	249	262	275	287
9			256	268	281	293

- Ladies' size 6
- Ladies width 240mm

Size in our shoes =
size 6/width 4E
or size 6/width V
or size 6/width 2V
